VPS Plesk Small Business Panel

A SIMPLE BUT POWERFUL CONTROL PANEL THAT SAVES YOU MONEY!

Parallels® Small Business Panel is a simple control panel for businesses to quickly and easily manage their IT needs. With its intuitive interface, Parallels Small Business Panel gives employees powerful productivity tools and saves your business money on training and software costs.

SIMPLE - ANYONE CAN USE IT!

Offer a Great User Experience

The super-intuitive interface design is easy for all employees. All daily functions are presented in a logical and obvious layout and hover-over contextual instructions give quick tips on how to use a specific feature or tool.

Easily Manage Websites

Set-up wizards and content editors make complicated tasks easy. Register domain names, manage content and view visitor statistics in a simple point-and-click interface. Employees can use the free site builder tool to create and update professional-looking websites in minutes – no technical skills required.

POWERFUL - GROWS WITH YOUR BUSINESS!

Be More Competitive Online

Get hundreds of the latest business applications at your fingertips! Browse a wide variety of apps designed to help you stay in step with technology and to compete online. Single-click downloads let you install or use web-based apps without any special training or technical knowledge.

Control Critical Access

Roles-based setup allows individual users to see only the tools designated for them, and online apps bring the right information to the right employees when they need it. Collaboration tools allow your employees to store and share files for improved work flow management.

SAVES MONEY - CONTAINS IT EXPENSES
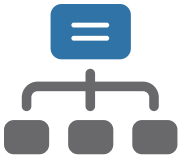

Increase Employee Productivity

Productivity tools include time tracking, email management, marketing, CRM, file sharing, blogs, and more. Plus one-click access to open source applications allows you to freely download many of the best open-source software solutions available for small to medium business needs.

Reduce IT Training Costs

Parallels Small Business Panel can be operated with little or no knowledge of servers. Your IT staff can train any employee on how to add users, setup e-mail, grant access, etc. The super-intuitive interface reduces the need for employee training and frees your IT staff for more complicated technical issues.
